

## NAIL TECHNICIAN, CERTIFICATE

### Nail Technician, Certificate

#### Overview

Students will receive theory as well as practical experience in nail care through classroom study, demonstrations and clinical experience. Some areas of study include safety and disinfection control, customer service, and job seeking skills. Students will also develop skills necessary to perform manicures, pedicures, artificial nail enhancements, massage techniques, and consultation. Upon successful completion of quota and hour requirements mandated by the Minnesota Board of Cosmetologists Examiners, students must also take a skills certification and written exam for licensure. Skilled nail technicians are in very high demand.

#### Locations

Jackson, Pipestone
