

DIESEL MECHANICS, DIPLOMA

Diesel Mechanics, Diploma

Overview

The Diesel Technology degree prepares future Technicians for the ever-changing diesel industry. Today, Diesel Technicians are in high demand. Individuals will learn to overhaul engine assemblies, troubleshoot electrical systems, operate diagnostic software devices, and work on air conditioning systems. They will learn about hydraulics, powertrains, fuel injection systems, and have the opportunity to experience how these systems work together to drive the diesel industry. Service department operations, computerized diagnostics, and GPS system operations also help prepare individuals for leadership roles in the diesel industry. Through the summer internship, students gain an understanding of how these courses blend together in the workplace. During their second year of the program, students accelerate their understanding and capabilities. Come join an ever-changing industry where countless opportunities are there for ambitious and driven individuals.

Course Number	Course Title	Credits
DSL 1100	Diesel Engine Theory	3
DSL 1105	Diesel Engine Lab	4
DSL 1110	Electrical Theory	2
DSL 1115	Electrical Lab	2
DSL 1120	Powertrain Principles	2
DSL 1125	Powertrain Lab	3
DSL 1130	Hydraulics Theory and Application	3
DSL 1135	Fuel Injection Principles	3
DSL 1142	Heating & Air Conditioning Systems	3
DSL 1150	Internship	4
DSL 2106	Advanced Powertrain Theory	3
DSL 2111	Advanced Powertrain Lab	4
DSL 2131	Service Department Operations & Procedures	3
DSL 2136	Fuel Systems Theory	5
DSL 2137	Fuel Systems Lab	5
DSL 2155	Diesel Engine Control Systems	3
DSL 2180	Computerized Diagnostics	2
DSL 2190	GPS Systems Operations	2
ELWT 1102	Hydraulics Lab	1
	TOTAL CREDITS	57
