

## DIESEL TECHNOLOGY, A.A.S.

### Diesel Technology, A.A.S.

#### Overview

The Diesel Technology degree prepares future Technicians for the ever-changing diesel industry. Today, Diesel Technicians are in high demand. Individuals will learn to overhaul engine assemblies, troubleshoot electrical systems, operate diagnostic software devices, and work on air conditioning systems. They will learn about hydraulics, powertrains, fuel injection systems, and have the opportunity to experience how these systems work together to drive the diesel industry. Service department operations, computerized diagnostics, and GPS system operations also help prepare individuals for leadership roles in the diesel industry. Through the summer internship, students gain an understanding of how these courses blend together in the workplace. During their second year of the program, students accelerate their understanding and capabilities. Come join an ever-changing industry where countless opportunities are there for ambitious and driven individuals.
