## SECTION HEADING

### HIMC 1140: Introduction to Health Records & Delivery Systems

#### Description

Introduction to Health Records & Delivery Systems provides a study that charts a path for success in the allied health field. The course focuses on how electronic health records (EHRs) and a philosophy of patient-centric care are currently impacting health information professionals in their everyday careers as well as the patients they serve. In a health information system that is becoming increasingly integrated and cross-disciplinary, health information students need to be equipped with the problem-solving skills to make important connections and to face the challenges and opportunities they will see in their careers.

#### Credits

3

#### Topics to be Covered

1. Healthcare delivery systems
2. Health Information careers and credentials
3. Documentation in the health record, structure and content
4. Confidentiality, privacy and security measures and policies and procedures for internal and external use and exchange to protect electronic health information
5. Accreditation, regulatory agencies, and third-party payer requirements
