NURS 2135: Geriatric and Psychiatric Nursing

Description

Geriatric & Psychiatric Nursing focuses on nursing process and clinical judgment in the care of patients and their families. Concepts of therapeutic communication, health promotion, safety, pharmacology, and nutrition are integrated throughout content. Unique needs of the gerian client and individuals experiencing disruption in their mental health will be addressed.

Credits

2

Prerequisite

Admission to the Associate in Science nursing program

Corequisite

None

Topics to be Covered

1. Holistic care of the older adult in the normal aging process.
2. Utilize the nursing process in planning holistic care.
3. Care of the frail older adult including end of life care.
4. Physiologic effects of aging and illness related to respiratory, psychological/cognitive, genitourinary, musculoskeletal, endocrine, gastrointestinal, hematologic, neurologic, and immune dysfunction in the older adult.
