## SECTION HEADING

### PHIL 2222: Medical Ethics

#### Description

Medical Ethics introduces students to the principles of ethics and how these apply to health care practice. Students will examine two main ethical theories, utilitarian and deontological, as they apply to questions of health care practice. Students will study the ethical principles of autonomy, nonmaleficence, and beneficence. The focus will be on the application of these theories and principles to specific cases. The course is designed for students intending to major in the field of health care.
